NEW

HARDY HERBACEOUS PERENNIALS

7 of the Choicest Recent Introductions

Chrysanthemum, Jane Kelsey

Years ago we introduced the now famous KOREAN CHRYSANTHEMUM. This was used to produce the lovely new KOREAN HYBRIDS which have earned a lasting place in American Gardens.

Among these Chrysanthemums, JANE KELSEY is outstanding. The large single flowers are a lustrous clear pink and are borne in great profusion. The plant is strong growing and of unusual hardiness, surviving the harshest winter weather. In the unusually difficult 1937 flowering season, JANE KELSEY was the only KOREAN HYBRID that flowered dependably and profusely in our test gardens.

Unsurpassed for garden use, it is equally desirable for inside decoration, lasting two weeks or more as a cut flower in the house.

Grow this in your garden. You will agree with us that it is the finest of all the KOREAN HYBRIDS.

Price.....\$.75 each, \$6.00 per 10

Chrysanthemum — Pygmy Gold

New in 1938, this distinct dwarf Korean Hybrid is another notable contribution of the Bristol Nurseries, Inc., Bristol, Conn. They describe it as "producing quantities of miniature blossoms slightly over one inch across. The color is a clear golden yellow, remarkable for its brilliance and intensity. Commencing to flower in early September, it is easily the most colorful early Chrysanthemum yet introduced. Unusual, also, because it retains its effectiveness right up until the season ends. Grouped in the rock garden or hardy border or used for edging, it will prove the delight of the autumn."

Price.....\$.50 each, \$4.00 per 10

Hemerocallis — Hyperion

Of all recently introduced DAYLILIES, HYPERION is unquestionably in greatest demand. In July and August it brightens the garden with large, waxy, lemon-yellow flowers on stout stems 3 to 3½ feet tall. It is vigorous in growth, with graceful arching foliage. Adding to its value is a delightful fragrance really unusual in this species. This choice plant is extremely hardy and gives great satisfaction under most trying conditions. It will do well in sun or shade. Award of Merit, Royal Horticultural Society of Great Britain.

Price.....\$1.25 each, \$10.00 per 10

Four Exquisite Asters

In our search for superior new plants, the Hardy Asters have offered a fertile field. Mr. Ray M. Koon, head of the Waltham Field Station of the Massachusetts State College, has made a distinguished contribution to horticulture in his study and evaluation of the many asters available to garden lovers. We offer here his choice as the four pre-eminent Hardy Asters, the finest red, the best pink, the choicest white, and a blue that is unsurpassed.

Bluebird

Among the scores of Hardy Fall Asters introduced in recent years, a few are outstanding. Among these, BLUEBIRD ranks high. The plant is thrifty in habit, growing to 2 or 3 feet in height. In Fall it is bright with vibrant blue flowers, 1 inch or more across. We do not hesitate to recommend this as one of the choicest hardy perennials for the Fall garden.

Price.....\$.75 each, \$6.00 per 10

Charles Wilson

Bearing large ruby-red flowers 1½ inches across, this choice and very rare gem is a distinct addition to our gardens. CHARLES WILSON attains about 3 feet in height when fully grown. Planted singly, it is a brilliant accent in the Fall garden picture; planted in masses, it will thrill you.

Price.....\$.75 each, \$6.00 per 10

Harrington's Pink

Not just another pink aster but acknowledged as the finest hardy pink aster, this unique variety will be welcomed by all garden enthusiasts. Being one of the newest of this important group, the stock is limited. Don't fail to get at least one plant for your garden.

Price.....\$.75 each, \$6.00 per 10

Mt. Everest

In our listing of new and rare asters, we are happy to include this variety. By far the finest white, it produces a mass of snowy flowers almost 2 inches across. The plant is quite compact in habit, growing 2½ feet high.

Price.....\$.75 each, \$6.00 per 10

OUR SPECIALTIES FOR 1938

A Selection of New and Unusual Plants

KELSEY PYGMY DOGWOOD

(*Cornus stolonifera* var. *kelseyi*)

A 1938 Introduction

This new, very dwarf variety of the Red-Osier Dogwood originated at Kelsey-Highlands Nursery several years ago. It has been carefully tested and we are happy to offer it to the public as an entirely different and valuable addition to our extensive list of ornamental plants. It has the characteristic dark red twigs of the Red-Osier Dogwood, but is a true pygmy, growing not over 18 inches tall, and distinguished by its much-branched compact habit of growth. Splendid for low hedges, borders, rock gardens and in any location where a low shrub is desirable. Will do well in full sun or moderate shade.

Price.....\$1.00 each, \$9.00 per 10, \$80.00 per 100

PRIMROSE FORSYTHIA

(*Forsythia intermedia primulina*)

No garden is complete without a Forsythia. This species is one of the choicest. In Spring the stout branches are hidden by a profusion of primrose-yellow flowers. Fine as a specimen or for hedges.

2-3 ft., \$.80 each, \$7.20 per 10, \$64.00 per 100.

DRAGON SPRUCE

(*Picea asperata*)

Most vigorous of the Chinese spruces, this dense broadly pyramidal tree was introduced by the Arnold Arboretum in 1910. Rare in cultivation, it has proven a distinct addition to our ornamental evergreens, and will be increasingly in demand as a specimen.

12-18 in., \$2.00 each, \$25.50 per 10.

18-24 in., 3.25 each, 29.25 per 10.

WILSON SPRUCE

(*Picea wilsoni*)

Introduced by the late "Chinese" Wilson, this very rare spruce is notable for its bright green foliage and handsome pyramidal form. Our supply is limited.

12-18 in., \$3.00 each, \$27.00 per 10.

RHODODENDRON, SMIRNOVI HYBRIDS

We present here the result of crossing the SMIRNOW RHODODENDRON with various Rhododendron Hybrids. The seedlings vary in character of foliage and flower, but are all distinguished by the great beauty of flower form and size. They vary in color from pale pink to bright red.

12-18 in., \$2.25 each, \$20.25 per 10.

18-24 in., 3.50 each, 31.50 per 10.

2-2½ ft., 5.00 each, 45.00 per 10.

WHITE CHINESE INDIGO

(*Indigofera decora alba*)

A rare oriental species of unusual beauty, bearing large snow-white pea-shaped flowers among bright green leaves.

Strong Plants, \$2.50 each, \$22.50 per 10

MOUNTAIN CRANBERRY

(*Vaccinium vitis-idaea minor*)

Native in our New England mountains, this splendid prostrate evergreen groundcover is seldom offered. The small flowers are white or pink, and are followed by brilliant red berries in the Fall. A real treasure for the rock garden, it will stand fullest exposure.

2-4 in., Pot Grown, \$.75 each, \$6.75 per 10.

CONIFEROUS EVERGREENS

The conifers offer a wide variety of size and form. They enliven bleak Winter landscapes with the warmth and color of their rich evergreen foliage; in Summer they seem to bring a sense of quiet and coolness to the garden. For formal or informal hedges, screens or windbreaks they are invaluable.

Care must be used in the choice, location and spacing of evergreens, for many will eventually reach a height of fifty to one hundred feet, while others are dwarf or spreading in habit and suitable for use where space is limited.

More plantings are spoiled through crowding than through planting too sparsely — so allow plenty of room for future growth.

Solid evergreen foundation plantings are seldom desirable. Ask for information as to other types of plant material suitable for use with evergreens in such plantings. We are glad to give expert advice to customers as to best varieties and proper treatment for each need and use.

Note: Figures after the names give approximate heights reached by the trees and shrubs under favorable conditions, first under cultivation, and then in their natural habitat.

For 1-4 plants of a kind and size use the single rate, 5-24 the ten rate. Ask for special prices on larger quantities.

CAROLINA HEMLOCK

Tsuga caroliniana

Introduced to cultivation by Harlan P. Kelsey. Prof. Sargent considered this “The handsomest conifer we can grow in New England.” Unique in habit, with dark, dense tufted foliage on sweeping pendulous branches. It is hardier and more adapted to trying city atmospheres than the Canada Hemlock and seems to thrive in southern latitudes where the latter becomes thin, yellow and unsightly. MOUNTAINLAUREL — *Kalmia latifolia*

BROADLEAF EVERGREENS

Andromedas, Kalmias, Leucothoe, Rhododendrons, etc.

No ornamentals have become more deservedly popular than the Broadleaf Evergreens. Their beauty of flower and foliage promises added possibilities in the landscaping of your grounds.

All of the species that we list—and most of them are natives of the United States—are perfectly hardy as far north as Quebec, if given proper soil conditions and exposure or location.

Mass plantings of Rhododendrons, Mountainlaurel and Andromedas, with “filler” or “edging” plants, such as Leucothoe, Heather, Rose Daphne and Sandmyrtle, are very desirable and probably show these Broadleaf Evergreens at their best. Such ground covers as Bearberry, Canby Pachistima and Japanese Pachysandra carpet the shady places luxuriantly.

To successfully grow these beautiful Broadleaf Evergreens, see that the soil is peaty, acid and well drained. Use a permanent mulch of Oak or other hardwood leaves (except Maple). A northern exposure is desirable, otherwise overhead leafy shade is essential. Ferns are at home in the Rhododendron bed and edgings of them or of Violets, Dicentras and a host of beautiful low ground covers give variety and beauty. Azaleas and Berrybearing Shrubs may be used freely in the planting with charming effects. We gladly aid customers in making up satisfactory combinations of “fillers” and other plant material for any proposed Rhododendron or Broadleaf planting.

RHODODENDRONS IN NORTH CAROLINA

K E L S E Y ' S
HARDY NATIVE COLLECTED
RHODODENDRONS, AZALEAS, MOUNTAIN-
LAUREL, LEUCOTHOE, ANDROMEDAS
FROM THE CAROLINA MOUNTAINS

The high Carolina Mountain district has always been the finest source of supply for collected Native Broadleaf Evergreens, Azaleas, etc. Harlan P. Kelsey was the first and for many years the only substantial source for these loveliest of hardy ornamental plants, many of which he introduced to cultivation.

Brilliance and variety of flower effect, a long season of bloom and rich foliage can be quickly and inexpensively attained with these plants.

We here offer the highest grade of material, all heavy, fresh dug clumps, carefully balled and burlapped. This super-grade stock is far superior to the usual mixed and light grades of collected stock usually sent out, and yet the prices are very reasonable. Do not be deceived, but buy and plant the best.

We recommend the use of this economical material for parks, large estates, roadside plantings and general landscape use, where rich effects of foliage and flower will add to the landscape. These species can also be supplied in nursery grown material in most sizes. For these and other varieties, see Azaleas, Page 19; Rhododendrons, Page 14; Leucothoe, Page 13; Andromeda, Page 15; and Kalmia, Page 13.

Carlot purchases are the most economical. See right hand columns for prices and average number in a car. Prices are f.o.b. No. Carolina and you pay the freight. Ask us for estimate of freight cost of any carload to any point in United States.

Smaller quantities are sold f.o.b. East Boxford, being shipped directly here and being repacked for delivery to individual customers. Due to increased cost of handling less than carlot quantities, prices are somewhat higher but still provide a very economical means of planting large areas.

On less than carlot quantities, orders will be accepted as follows:

Until April 15 for delivery before May 15
 Until May 10 for delivery before June 1
 Until Sept. 1 for delivery before Oct. 1
 Until Oct. 10 for delivery before Nov. 1
 Until Nov. 10 for delivery before Dec. 1

Address all orders and inquiries to:

MALUS — THE FLOWERING CRAB

The Flowering Crabs have few rivals among gorgeous Spring flowering trees and shrubs. At the Arnold Arboretum one of the most important events of the year is the blooming of the Crabs, followed by the showy fruit in Autumn. Most varieties are of greatest value as feed in winter for Pheasants, Grouse and other birds.

They are of easy culture, and whether planted singly or in masses, give remarkable and quick results. As soon as the ground can be worked in Spring is an ideal time for planting, and again in Fall after foliage is well ripened. Give rich soil and mulch heavily. Use all the water the soil will take in planting.

PRICE OF FLOWERING CRABS

	Each	10
3-4 ft.....	\$1.25	\$11.25
4-5 ft.....	1.75	15.75

WASHINGTON ELM

The late Jackson Dawson, noted Horticulturist, made grafts from a branch of the famous Cambridge Elm, under which George Washington took command of the Continental Army in 1775, thus saving for posterity true descendants of this historic tree, which since has been destroyed. Cambridge Elm pictured below.

At the request of the founder of the Arnold Arboretum, the late Professor Charles Sprague Sargent, we have built up a stock of sturdy trees from this unique and authentic source and offer them at very reasonable prices to tree-lovers who prize such treasures. A numbered certificate of authenticity and a permanent embossed metal marker is sent with each tree if desired.

KELSEY'S SPECIAL
LAWN GRASS SEED

In our horticultural and landscape service, we consider dependable grass seed a most important item. The mixtures we offer below contain the finest grade of seed in proper proportions. Our formulas are the fruit of experience and study of soil conditions and lawn needs of Northeastern United States. Best results come from early Spring sowing and again in August and September.

Kelsey's SUPERLAWN Mixture.

A noteworthy mixture of finest perennial turf grasses and domestic rye-grass. Only seeds of high and tested quality are used. This formula is particularly designed for the neutral to acid soil almost universally found in the North Atlantic States. Sow one pound to 400 sq. feet.

1 lb.....	\$.50	5 lbs.....	\$2.35	10 lbs.....	\$4.50	25 lbs.....	\$10.00
-----------	-------	------------	--------	-------------	--------	-------------	---------

Kelsey's BENTLAWN Mixture.

This is a superb bent mixture which will produce a fine firm turf of unusual appeal. The Astoria Bent is carefully blended with other fine grasses so as to combine the elegance of a Bent lawn with the dependability of the less "fussy grasses." Sow one pound to 300 sq. ft.

1 lb.....	\$1.00	5 lbs.....	\$4.75	10 lbs.....	\$9.00	25 lbs.....	\$20.00
-----------	--------	------------	--------	-------------	--------	-------------	---------

Kelsey's SHADYLAWN Mixture.

The shady spot in your garden requires a grass seed mixture especially designed for shade tolerance. Such a mixture is Kelsey's SHADYLAWN, a dependable blend of proven value. Sow one pound to 300 sq. feet.

1 lb.....	\$.75	5 lbs.....	\$3.55	10 lbs.....	\$6.75	25 lbs.....	\$15.00
-----------	-------	------------	--------	-------------	--------	-------------	---------

Kelsey's SHORELAWN Mixture.

Kelsey's SHORELAWN Grass Seed is a skillful blend of fine grasses from a formula of proven success on many North and South Shore estates, where acid and usually sandy soil, extreme exposure and salt spray are the rule. Sow one pound to 300 sq. feet.

1 lb.....	\$.75	5 lbs.....	\$3.55	10 lbs.....	\$6.75	25 lbs.....	\$15.00

Hardy Native Collected

LOW GROWDCOVERS AND SHRUBS

Americans are at last realizing how ruthlessly in the past nature has been man-handled and destroyed in the name of progress and profit, and that now it is imperative to again cover with beautiful native growth the waste places, roadsides and woodlands, so as to redeem our incomparable landscapes, prevent soil erosion, and give natural food and protection to our fast disappearing wild bird and animal life.

Nature's delicate equilibrium has been badly upset and should be restored unless floods, drought, insect pests, and plant diseases are surely to overwhelm us.

Experts now agree that trees alone will not accomplish this and that the use of native shrubs and permanent low groundcovers in vast quantities is absolutely necessary.

Therefore for this purpose we are offering below a selected list of economical material in strong plants, clumps and sods. We are always glad to advise with customers on this important subject so they may secure the most satisfactory results.

LOW GROWDCOVERS

LISTS OF PLANTS FOR SPECIAL ENVIRONMENTS

PLANTS SUITABLE FOR ROCK GARDENS

EVERY Rock Garden has problems of its own. No list of this nature can in any way be complete—it can merely suggest a few of the varieties that are being successfully used in the finest American Rock Gardens. Herbaceous perennials are not included, as use of the various kinds depends on the type and size of the rock garden. We will gladly make recommendations of perennials to use for given types of rock garden.

Aesculus discolor mollis
Amelanchier stolonifera
Arctostaphylos uvaursi
Azalea pentaphylla
Azalea poukhanensis
Berberis, Truehedge Barberry

PLANTS FOR MOIST SOILS

MOST plants will not stand a location that is quite moist a great deal of the time. These varieties, however, do not seem to mind considerable moisture if proper drainage is provided. In many cases it increases their growth and gives them finer foliage.

Care must be used in choosing varieties that will best suit your particular location and we are prepared to help you plan correctly.

KELSEY'S HORTICULTURAL AND LANDSCAPE SERVICE

Customers of Harlan P. Kelsey, Inc. will find our various branches of service of real value throughout the year. Some special features of this service are described below.

1. **RENOVATION OF GARDENS AND PLANTATIONS.** Overgrown or run down gardens can often be improved immeasurably by readjustment, pruning, fertilization, the addition of a few plants, etc. Let us help you make your garden more interesting and enjoyable.
2. **HEDGES, WINDBREAKS AND SCREENS.** The growing of fine material for evergreen and deciduous hedges, windbreaks and screens is a specialty at Kelsey-Highlands Nursery. For protection from harsh winds, for masking unsightly views and to insure privacy the larger screens are often invaluable. Lower hedges and borders are pleasing essentials in many garden designs. We will gladly submit recommendations and quotations for individual problems. A far wider list is available for these uses than is generally supposed. See Page 4.
3. **COLLECTED NATIVE PLANTS.** Roadsides, woodlands, banks, borders and the like are delightfully and permanently improved by a free use of our choice and beautiful native plants and flowers. Our list of hardy American bulbs, ferns, herbaceous perennials and low groundcover shrubs is extensive. Most of these can be supplied in strong cut "sods" or as individual clumps or plants. We supply any quantity and will gladly make up special carload prices when desired. See pages 49-50 for further information.
4. **PLANTINGS FOR BIRDS.** Birds add beauty and song to the garden, and are of greatest value in curbing insect damage. Every garden should include plants that provide natural bird food and cover. We know what these plants are and will gladly help you plan their proper use. Birds are a constant joy and entertainment in the garden—a bird-feeding station in a corner of your garden dedicated to bird life will be a continuing delight. See Page 51 for Berry Bearing Plants.
5. **RARE AND UNUSUAL PLANTS.** For half a century Kelsey-Highlands Nursery has been noted for its rare and new plants. Among the introductions of Harlan P. Kelsey have been some of America's choicest ornamentals. These include Carolina Hemlock, Pinkshell Azalea, Korean Chrysanthemum and the Kelsey Korean Hybrids, Galax, Grays Lily, Carolina Rhododendron, White Carolina Rhododendron, Kelsey Catawba Rhododendron, Mountain Silverbell, Kelsey Locust, Kelsey Pygmy Dogwood and others. We grow many of the choicest introductions of the Arnold Arboretum, the U. S. Department of Agriculture, etc.
6. **MOVING LARGE SPECIMEN TREES.** Our tree moving-equipment is especially designed for safely transplanting large Evergreens or Shade Trees up to almost 1 foot in diameter. We have many handsome specimens of Pine, Hemlock, Spruce, Fir and Shade Trees in wide variety from 10 to 30 feet in height. These are moved with large balls with little disturbance to the root systems, largely eliminating risks.

LANDSCAPE SERVICE

Harlan P. Kelsey, Inc. offers a skilled service devoted to the creation of finer landscapes. After a careful study of each individual problem we recommend a development which will fit the particular location so as to combine beauty and convenience with economy of construction and maintenance. Our background of sound designing and horticultural experience assures such results.

Overgrown or run down gardens can often be improved immeasurably by readjustment, pruning, fertilization, the addition of a few plants, etc. Let us help you make your garden more interesting and enjoyable.

We are particularly interested in the small home grounds. Consult us freely whether your problem is large or small.

No charge is ordinarily made for a preliminary conference at our office, or on the grounds where most effective results are ordinarily obtained. If however considerable time or distance is involved a minimum charge is made to cover costs.

TERMS AND CONDITIONS OF SALE

NOMENCLATURE "Standardized Plant Names" is authority for names used in this catalog.

PRICES in this catalog cancel all previous lists and quotations and are subject to change without notice. Retail prices include packing, except for bulky or unusual shaped plants or when special methods are requested; prices are f.o.b. East Boxford, Massachusetts. No charge for local truck delivery on our regular delivery routes and days.

ALL ORDERS ARE ACCEPTED SUBJECT TO prior sale and to condition of stock at delivery date, under the following terms and conditions:

GRADE. We supply a standard grade of stock. Unusual specimen material or plants specially selected by customers at the nursery will be charged for according to value, irrespective of the catalog list price.

WE WARRANT all plants to be true to name, full count, up to grade, and in good condition when shipped.

RATES. Lots of 5 and 25 of a kind and size will be furnished at the 10 and 100 rates respectively.

PLANT INSURANCE. We do not guarantee the life of any plant purchased, as we have no control over after-treatment or weather conditions, and we will not replace stock without charge. On request, we insure stock planted by us for a specified period at a rate covering the estimated hazard. Such insurance however is void unless account is paid in full within 30 days from date of invoice, except when special arrangements are agreed to by us in writing.

TERMS CASH WITH ORDER or satisfactory reference from unknown customers. Established credit accounts are due in 30 days from date of invoice. C.O.D. orders must be accompanied by one-third of the amount. Overdue accounts are subject to interest at 6 per cent.

SHIPPING INSTRUCTIONS should accompany order. State whether by Freight, Express, Parcel Post or Truck, and give exact destination. Otherwise, we use our best judgment but assume no responsibility thereby. We deliver by truck all over New England and nearby states at reasonable rates.

All goods are at purchaser's risk after delivery to forwarding companies in good condition. Claims for damage while in transit must be made against the delivery company.

CLAIMS for errors must be made in writing within five days after receipt of goods. Any mistake or fault on our part will be gladly rectified. Stock delivered as per order and in good condition is not returnable.
